

CompBL V2.0 Benefits and Features

Benefits (General):

- **Control.** Know what ClearCase artifacts have been changed. Any time.
- **Simplicity and comfortably.** Smart, simple and user-friendly interface.
- **Fully-automated.** You can run CompBL daily or nightly with predefined comparison rules.
- **Seamlessly integrated with your ClearCase environments.** Get your first report in less than a minute after downloading!
- **BI (Business Intelligence)** of ClearCase assets

Benefits to manager:

- Always know the current status
- Take decisions by real-time information
- Track any change, and answer the questions of *who* made a change, *what* change was made, *when* the change was made, and *why* the change was made.

Command-line interface	X	V

A few examples of reports that you can gain by using CompBL v2.0:

- What changes have been made since the latest baseline was created?
- What is the difference between two streams?
- What is the difference between recommended baselines of two streams, based on the same (foundation) baseline?
- What activities have been made between two baselines?
- You can track any change, and answer the questions of *who* made a change, *what* change was made, *when* the change was made, and *why* the change was made.
- Activities delivered since the last baseline
